with you at all times**

**Other information
(please complete):**

Your name:

Date first prescribed:

Treating doctor's name:

Treatment centre name:

Treatment centre phone number:

You should avoid intense and prolonged exposure to direct sunlight during Voriconazole treatment. It is important to cover sun exposed areas of skin and use sunscreen with high sun protection factor (SPF), as an increased sensitivity of skin to the sun's UV rays can occur.

There is a small chance that skin cancer could develop over time.

You should contact your doctor if you experience sunburn or severe skin reactions following exposure to light or sun.

Please ensure you undergo all follow-up visits for skin evaluations arranged by your doctor.

Please have a list of all your other medicines and medical conditions available at each visit to a healthcare professional.

Please report any adverse events using the MHRA Yellow Card Scheme at

www.mhra.gov.uk/yellowcard

or search for MHRA Yellow Card in the Google Play or Apple App Store
