RECONSTITUTION OF MYALEPTA®▼ (METRELEPTIN POWDER FOR SOLUTION FOR INJECTION)

To obtain the Myalepta solution for your injection, you need to mix the Myalepta powder with the water for injection.

Myalepta vial	Water for injection	Syringe to use	You will be using
 11.3 mg	2.2 mL	3.0 mL	
 5.8 mg	1.1 mL	3.0 mL	
 3.0 mg	0.6 mL	1.0 mL	

Depending on your dose you will use either a 3.0 mL or 1.0 mL syringe to reconstitute Myalepta. The larger (green) needle is used for this step.

Please refer to the detailed Instructions for Use in the Myalepta pack before attempting to prepare and inject your Myalepta.

SYRINGE USED TO RECONSTITUTE MYALEPTA

3.0 mL syringe 1.0 mL syringe

You will be using

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in the package leaflet. This medicine is subject to additional monitoring. This will allow quick identification of new safety information. You can help by reporting any side effects you may get. See www.mhra.gov.uk/yellowcard for how to report side effects. Side effects should also be reported to Amryt by e-mail to medinfo@amrytpharma.com or by telephoning the free phone number **00 800 4447 4447**.

Patient Dose Information Card

Your Myalepta dose is _____ mg

injecting _____ mL or _____ units.

ADMINISTRATION OF MYALEPTA (METRELEPTIN POWDER FOR SOLUTION FOR INJECTION)

To self-inject Myalepta, you need to fill the syringe with the right amount of Myalepta solution.

Depending on your dose you will use a 2.5 mL, a 1.0 mL or a 0.3 mL syringe to inject Myalepta. The yellow needle is used for this step.

Your doctor or nurse has drawn a line to indicate your dose on the syringe.

If you have any questions about your dosage, the reconstitution or administration of Myalepta, contact your specialist service healthcare team before you self-inject Myalepta. More information is available in the Myalepta Patient Care Guide.
